The Autism Lens

Everything teachers need to connect with students, build confidence, and promote classroom learning

Kara Dymond

136 pp • ISBN 978-1-55138-347-7 • \$24.95 • K-6 • October 2020

The Autism Lens helps teachers connect to students with autism and support them along their own unique trajectory. Bringing to life communication difficulties that impact socialization and learning, this book removes the guesswork by offering practical solutions to oft-occurring challenges. Based on years of conversations with teachers, support staff, parents, and students, the practical strategies in this timely book will relieve any teacher anxiety you might feel around meeting the needs of a child with autism. You will learn how to nurture, support, and engage students in creative ways. Numerous easy-to-use, classroom-tested strategies—which will benefit the entire class—are explored in this comprehensive resource.

The power of the teacher–student connection is at the heart of this book. Woven throughout are stories about real students that will encourage you to look at instruction from students’ points of view. From this perspective, you can build relationships, gain trust, and nudge children into the space where learning happens.

Cultivating Writers

Elevate your writing instruction beyond the skills to ignite the will

Anne Elliott & Mary Lynch

148 pp • ISBN 978-1-55138-345-8 • \$24.95 • 3-8 • September 2020

Discover concrete ways to take writing instruction beyond the skills to ignite the will to write among grades 3-8 students.

Based on extensive classroom experience, this practical book explores six essential steps to help students tap into their own life experiences, model the habits of a writer, and make use of the tools of the trade. Strategies throughout the book illustrate how to create an environment that helps students see writing as a rewarding experience in and outside the classroom. Powerful real-life anecdotes and ready-to-use activities support this guide to developing classrooms full of thoughtful, passionate writers.

A ‘must have’ resource for classroom teachers...I know *Cultivating Writers* will be as practical and helpful as their first book...” — @janebaird123, Sept. 1, 2020

Teaching Fairly in an Unfair World, 2nd Edition

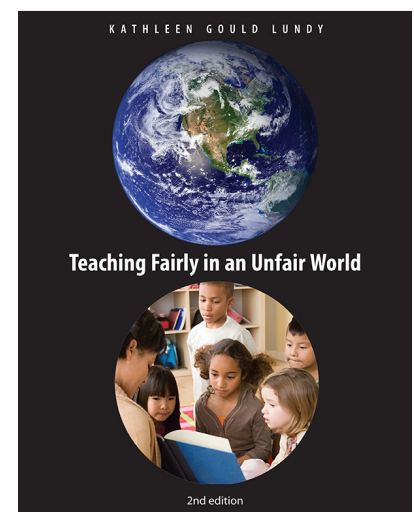

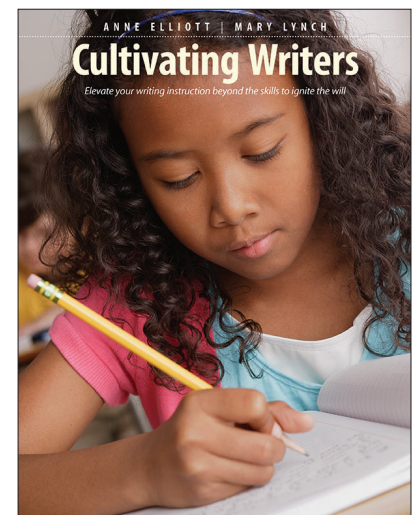

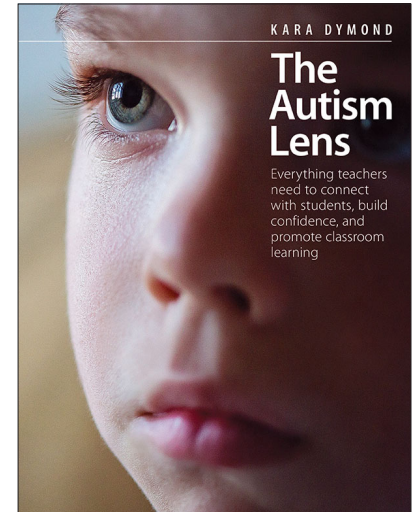

Kathleen Gould Lundy

198 pp • ISBN 978-1-55138-343-9 • \$24.95 • K-12 • August 2020

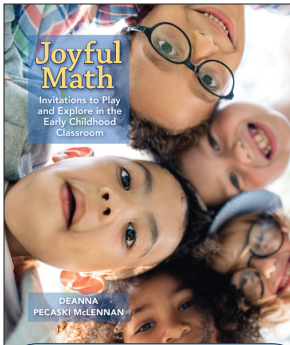

This is a book about teaching fairly; it is also a book that provides ways of teaching about fairness. The world is an increasingly chaotic and complex place, and this book aims to help teachers keep their students safe, while still challenging them to look critically and compassionately at the world around them.

An important revision of a ground-breaking book, *Teaching Fairly* offers opportunities to reflect on the current social, political, and cultural climate. It helps students connect with social justice issues through inventive language exploration and critical examination of all forms of media. It encourages teachers to evaluate their core teaching beliefs and acknowledge the realities of their students’ lives so that all can achieve a richer understanding of our complex world. A compendium of more than fifty strategies, along with reproducible pages for easy classroom use, complements this essential resource.

This timely book is an essential resource for today’s evolving classrooms. Its practical activities, useful resources, and classroom techniques will help students make sense of the world around them.

Joyful Math

Invitations to play and explore in the early childhood classroom

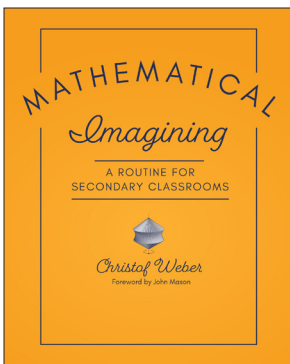

Deanna Pecaski McLennan

160 pp • ISBN 978-1-62531-325-6 • \$39.95 • PreK-1
Coming in October 2020

Joyful Math is about creating invitations for young children to engage with math ideas through art, literacy, and outdoor play. It focuses on building spaces in early childhood classrooms in which children see themselves as mathematical thinkers with valuable ideas from the very start.

The book is filled with a range of tools and models, including:

- stories, vignettes, and photos illustrating how to develop a classroom environment that fosters curiosity and wonder for mathematics
- practical tips for inviting students to engage in mathematical play throughout the day
- examples of ways to document children's experiences to make math learning visible to parents and the greater community

Mathematical Imagining

A routine for secondary classrooms

Christof Weber

234 pp • ISBN 978-1-62531-277-8 • \$44.95 • 8-12
Coming in October 2020

"Imagine a plastic cup lying on the floor. Give the cup a nudge so that it begins to roll. What does the path it takes look like?"

So begins the journey that Christof Weber takes you on in *Mathematical Imagining*. Along the way, he makes the

case that the ability to imagine, manipulate, and explain mathematical images and situations is fundamental to all mathematics and particularly important to higher level study. Most importantly, drawing on years of experiments in his own classroom, Weber shows that mathematical imagining is a skill that can be taught efficiently and effectively.

Mathematical Imagining describes an original routine that gives students space and time to imagine a mathematical situation and then revise, discuss, and act upon the mental images they create. You can use this creative routine in your secondary classroom to glimpse into your students' thinking and discover teaching opportunities while empowering them to create their own mathematics.

This one-of-a-kind resource is for secondary teachers looking to inspire student creativity and curiosity, deepen their own subject matter knowledge and pedagogical content knowledge, and invite all students to access the power of their own mathematical imaginations.

The Literacy Workshop

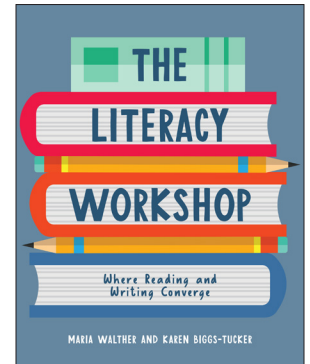

Where reading and writing converge

Maria Walther & Karen Biggs-Tucker

304 pp • ISBN 978-1-62531-196-2 • \$49.95 • K-8
Coming in October 2020

The Literacy Workshop offers a practical process for creating an integrated literacy workshop using demonstration lessons that align with current curriculum standards. By weaving together the common threads of literacy learning, you can increase the time your students spend engaged in authentic reading and writing.

This first-of-its-kind resource offers a clear, succinct explanation of the structure of the literacy workshop, over fifty demonstration lessons for all grades, a substantial library of reproducibles, and much more. *The Literacy Workshop* will be your guide as you blur the lines between your workshops—creating space for students to apply their learning and practice the habits, behaviors, and actions of literate, engaged citizens.

Thinking Like a Generalist

Skills for navigating a complex world

Angela M. Kohnen & E. Wendy Saul

200 pp • ISBN 978-1-62531-106-1 • \$44.95 • 4-8
Coming in October 2020

A generalist is curious, open-minded, skeptical, and persistent in their quest for information. *Thinking Like a Generalist* demonstrates what it means to take a generalist stance in instruction and provides a set of teaching tools to be able to pass those skills to students—skills that will transfer beyond the walls of the classroom.

Inside you'll find the following:

- a thorough introduction to what it means to be a "generalist", and how to develop the practices and tools that help generalists navigate the world we live in
- a focus on the teacher becoming a generalist and tips for modeling those practices in the classroom
- detailed instructions on how to write a unit of study that emphasizes generalist literacy skills and includes an overview and examples of five different units
- how to use the authors' read-aloud-think-aloud strategy to orient students to generalist tools and practices
